Experience

Parker Design Consultants / Web Developer

August 2014 - Present, Lostock Gralam

Building and maintaining a large number of websites (mostly WordPress sites with some custom builds thrown in the mix as well) ranging from large insurance businesses to local wedding venues, across several different server configurations / environments. Working quickly and efficiently to keep projects within budget and delivered on time while ensuring the site is built to a high standard.

Liaising with current and potential clients to determine their technical needs and quoting up projects. Working with clients, as well as in house designers, throughout the project lifecycle.

Secondary role as Head of Email Development, designing and building static & responsive email templates.

Blemain Group / Junior Web Developer

February 2013 - August 2014, Cheadle Royal

Maintaining 15 inhouse websites under the Blemain Group Company, which are viewed by both professional brokers and general customers, ensuring each site is fully responsive and compiles with modern-day coding standards.

Designing, building and sending promotional emails to lists of brokers.

Earth Design / Junior Web Designer / Developer

July 2011 - February 2013, Staffordshire

Contacting and liaising with clients on their website design and needs. Working with the clients from the start with wireframes to the finished product.

—

Education

University of Chester / Psychology with English Lit.

2008 - 2011, Chester

Recognised as a part of the British Psychology Society.
